

Ankara University- Center of Excellence For Superconductivity Research Project

Job Title:	Postdoctoral Research Position
Job Number:	2011/1
Date Posted:	13/05/2011
Application Deadline:	13/06/2011

Job Description

MgB₂ wires and Tapes

Applications are invited for a Postdoctoral Research Scientist Position at Ankara University, in the Project of Center of Excellence for Superconductivity Research. Qualified candidates must have a PhD with a background in wires & tapes of MgB₂ with demonstrated ability to conduct outstanding research

Some experimental and theoretical facilities for outstanding research are available both in Physics Department and in the collaborating Institutions. More information on the project can be found at: <http://usmal.ankara.edu.tr>. Successful candidates will interact with the principal investigator, research scientists, graduate students, and external collaborators.

Targeted start date is approximately July or August 2011 with possible flexibility. Interested candidates are expected to be experienced with wire & tape production and characterizations together with an experience on MgB₂. If interested, please send your CV together with expected salary and arrange to have 3 recommendation letters sent separately to Prof. Dr. Ali Gencer at gencer@science.ankara.edu.tr
